

OUTSIDE CANTILEVER SYSTEM

Two piece arch air flow outside cantilever system disperses energy upon impact before it gets to cantilever yoke and body cushions

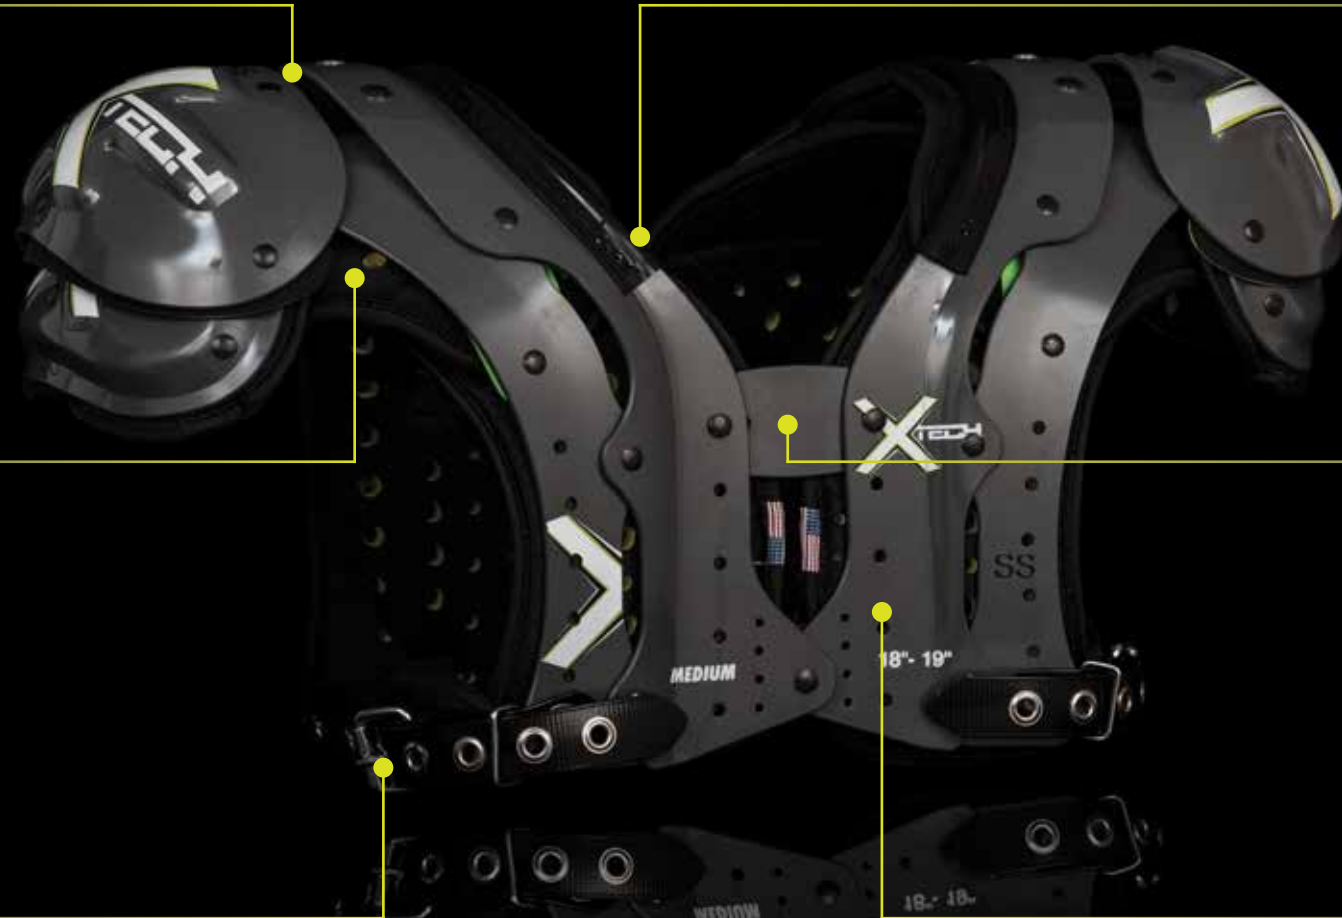

ADJUSTABLE CHANNEL SYSTEM

Separate front and back body cushions allow the channel to be adjusted to each individual player

SWIVEL BELT & BUCKLE SYSTEM

Hi-flex Bio-Thane® swivel belt and buckle system which prevent the pad from riding up on the players torso

CANTILEVER YOKE SYSTEM

Transfers energy upon impact throughout entire shoulder pad, not just over one side

3-POINT SWIVEL ARCH ATTACHMENT

Front and back 3-point swivel-lock arch attachment allows player total mobility and locks in place on impact

FRONT & BACK VENT HOLES SYSTEM

Coupled with vent holes punched in the body cushions, this allows direct air flow to the players body, enhancing the cooling process

Exclusive Partnership: XRD® Technology found within XTECH pads combines the latest materials science with ultimate design capabilities. XRD® Technology is flexible, lightweight, and engineered for repeated impact.

ARCH

STANDARD (ST): Providing the most protection XTECH has to offer

SKILL (SK): Offering players extra range of motion

SUPER-SKILL (SS): Offering players maximum range of motion

EPAULET

STANDARD (ST)

SKILL (SK)

SUPER-SKILL (SS)

CUP

STANDARD (ST)

SKILL (SK)

SUPER-SKILL (SS)

SHOULDER FOAM

STANDARD (ST): High-impact or players with existing shoulder injuries

SKILL (SK): Recommended for all skill positions

TAB (T): Recommended for kickers and punters

US Patent No. 9,238,167
*Additional Patents Pending

SIZING

SIZE	ARCH OPTIONS	SHOULDER WIDTH
XS	SK	"16 – 17"
SM	SK, SS	"17 – 18"
M	ST, SK, SS	"18 – 19"
L	ST, SK, SS	"19 – 20"
XL	ST, SK, SS	"21 – 22"
2X	ST, SK	"22 – 23"
3X	SK	"23 – 24"
